Policy of the Journal and Instructions to Authors 1

Proteins

The characterization of C-phycocyanin from an extremely halo-tolerant blue–green alga, *Coccochloris elabens*.
By O. H. W. Kao, D. S. Berns & W. R. Town 39

The organ-specificity of ferritin in human and horse liver and spleen.
By R. R. Crichton, J. A. Millar, R. L. C. Cumming & C. F. A. Bryce 51

The reactivity of functional groups as a probe for investigating the topography of tobacco mosaic virus. The use of mutants with additional lysine residues in the coat protein.
By R. N. Perham 119

Studies on the heterogeneity of subfragment-1 preparations. Isolation of a new proteolytic fragment of the heavy chain of myosin.
By D. Stone & S. V. Perry 127

The purification, composition and specificity of wheat-germ agglutinin.
By A. K. Allen, A. Neuberger & N. Sharon 155

Enzymology

Partial reactions of D-glucose 6-phosphate–1L-*myo*inositol 1-phosphate cyclase.
By J. E. G. Barnett, A. Rasheed & D. L. Corina 21

Kinetic properties of the partially purified pyruvate dehydrogenase complex of ox brain.
By J. P. Blass & C. A. Lewis 31

Kinetic studies of nitrogenase from soya-bean root-nodule bacteroids.
By F. J. Bergersen & G. L. Turner 61

PAGE

The deoxyfluoro-D-glucopyranose 6-phosphates and their effect on yeast glucose phosphate isomerase.
By E. M. Bessell & P. Thomas 77

The effect of substitution at C-2 of D-glucose 6-phosphate on the rate of dehydrogenation by glucose 6-phosphate dehydrogenase (from yeast and from rat liver).
By E. M. Bessell & P. Thomas 83

Immunological properties of *N*-acetyl-β-D-glucosaminidase of normal human liver and of GM_2-gangliosidosis liver.
By M. Carroll & D. Robinson 91

The significance of abrupt transitions in Lineweaver–Burk plots with particular reference to glutamate dehydrogenase. Negative and positive co-operativity in catalytic rate constants.
By P. C. Engel & W. Ferdinand 97

Determination of the operational molarity of solutions of bovine α-chymotrypsin, trypsin, thrombin and Factor X*a* by spectrofluorimetric titration.
By G. W. Jameson, D. V. Roberts, R. W. Adams, W. S. A. Kyle & D. T. Elmore 107

Some properties of the uridine diphosphate glucuronyltransferase activity synthesizing thio-β-D-glucuronides.
By H. P. A. Illing & G. J. Dutton 139

Shapes of curves of pH-dependence of reactions.
By H. B. F. Dixon 149

Peptide inhibitors of *Streptomyces* DD-carboxypeptidases.
By M. Nieto, H. R. Perkins, M. Leyh-Bouille, J.-M. Frère & J.-M. Ghuysen 163

Glucocerebrosidase: reconstitution of activity from macromolecular components (*Short Communication*).
By M. W. Ho, J. S. O'Brien, N. S. Radin & J. S. Erickson 173

Contents of Volume 131, No. 2

PAGE

Proteins

Characterization of alternative molecular forms of xanthine oxidase in the mouse.
By E. J. Duke, P. Joyce & J. P. Ryan 187

The amino acid sequence of cytochrome *c* from *Allium porrum* L. (leek).
By R. H. Brown & D. Boulter 247

The amino acid sequence of cytochrome *c* from *Spinacea oleracea* L. (spinach).
By R. H. Brown, M. Richardson, R. Scogin & D. Boulter 253

Effect of alcohols and neutral salt on the thermal stability of soluble and precipitated acid-soluble collagen.
By A. E. Russell 335

Phosphorylation of the '37000 component' of the troponin complex (troponin-T) (*Short Communication*).
By S. V. Perry & H. A. Cole 425

Nucleic Acids

The preparation and analysis of a new trinucleotide from yeast ribonucleic acid, containing two adjacent 2′-*O*-methylpentose residues.
By A. R. Trim & J. E. Parker 257

Terminal sequence studies of high-molecular-weight ribonucleic acid. The 3′-termini of rabbit globin messenger ribonucleic acid.
By J. A. Hunt 315

Interaction between polyuridylic acid and rabbit globin messenger ribonucleic acid.
By J. A. Hunt 327

Lipids

The effect of a lipid-rich diet on the properties and composition of lipoprotein particles from the Golgi apparatus of guinea-pig liver.
By M. J. Chapman, G. L. Mills & C. E. Taylaur 177

Carbohydrates

The quantitative measurement of Alcian Blue–glycosaminoglycan complexes.
By P. Whiteman 343

The quantitative determination of glycosaminoglycans in urine with Alcian Blue 8GX.
By P. Whiteman 351

PAGE

Small Molecules

Structural requirements for binding to the sugar-transport system of the human erythrocyte.
By J. E. G. Barnett, G. D. Holman & K. A. Munday 211

Epoxy derivatives of aromatic polycyclic hydrocarbons. The preparation and metabolism of epoxides related to 7,12-dimethylbenz[*a*]anthracene.
By P. Sims 405

Isocoproporphyrin: nuclear-magnetic-resonance- and mass-spectral methods for the determination of porphyrin structure (*Short Communication*).
By M. S. Stoll, G. H. Elder, D. E. Games, P. O'Hanlon, D. S. Millington & A. H. Jackson 429

Enzymology

Milk xanthine oxidase type D (dehydrogenase) and type O (oxidase). Purification, interconversion and some properties.
By M. G. Battelli, E. Lorenzoni & F. Stirpe 191

Palmitoyl-coenzyme A synthetase. Mechanism of reaction.
By J. Bar-Tana, G. Rose, R. Brandes & B. Shapiro 199

A kinetic study of rabbit muscle pyruvate kinase.
By S. Ainsworth & N. MacFarlane 223

Multiple forms of nuclear deoxyribonucleic acid polymerases and their relationship with the soluble enzyme.
By R. L. P. Adams, M. A. L. Henderson, W. Wood & J. G. Lindsay 237

A study of the kinetics and mechanism of yeast alcohol dehydrogenase with a variety of substrates.
By F. M. Dickinson & G. P. Monger 261

Protein kinase activity in commercially available crystalline yeast alcohol dehydrogenase.
By B. E. Kemp, M. Froscio & A. W. Murray 271

Kinetic studies on the regulation of rabbit liver pyruvate kinase.
By M. G. Irving & J. F. Williams 287

PAGE

Studies on the interaction between rabbit liver pyruvate kinase and its allosteric effector fructose 1,6-diphosphate.
By M. G. Irving & J. F. Williams 303

The inhibition of pig kidney alkaline phosphatase by oxidized or reduced nicotinamide–adenine dinucleotide and related compounds.
By I. Ramasamy & P. J. Butterworth 359

The modification of cholinesterase activity by 5′,5′-dithiobis-(2-nitrobenzoic acid) included in the coupled spectrophotometric assay. Evidence for a non-catalytic substrate-binding site.
By C. Brownson & D. C. Watts 369

Tryptophan 5-hydroxylase in rat intestine.
By T. Noguchi, M. Nishino & R. Kido 375

Partial purification and properties of a β-*N*-acetylglucosaminidase from the fungus *Sclerotinia fructigena*.
By F. Reyes & R. J. W. Byrde 381

PAGE

Aminolaevulinate synthetase of *Micrococcus denitrificans*. Purification and properties of the enzyme, and the effects of growth conditions on the enzyme activity in cells.
By G. H. Tait 389

Inhibition by acetaldehyde of the pyruvate dehydrogenase complex from ox brain and ox kidney (*Short Communication*).
By J. P. Blass & C. A. Lewis 415

Cathepsin A in human brain and spleen (*Short Communication*).
By D. M. Bowen & A. N. Davison 417

Competitive inhibition and substrate activity of uridine diphosphate 6-deoxygalactose for *Escherichia coli* uridine diphosphate galactose 4-epimerase (*Short Communication*).
By M. Spencer, P. Blackburn, W. Ferdinand & G. M. Blackburn 421

Intermolecular Organization

Protein synthesis and the viability of rye grains. Loss of activity of protein-synthesizing systems *in vitro* associated with a loss of viability.
By B. E. Roberts, P. I. Payne & D. J. Osborne 275

Contents of Volume 131, No. 3

PAGE

Proteins

Rat liver microsomal palmitoyl-coenzyme A synthetase. Structural properties.
By J. Bar-Tana & G. Rose 443

Amelogenins. Purification and partial characterization of proteins from developing bovine dental enamel.
By F. M. Eggert, G. A. Allen & R. C. Burgess 471

The amino acid sequence of cytochromes *c*-551 from three species of *Pseudomonas*.
By R. P. Ambler & M. Wynn 485

Extraction of cartilage protein–polysaccharides with inorganic salt solutions.
By R. M. Mason & R. W. Mayes 535

The composition of cartilage proteoglycans. An investigation using high- and low-ionic-strength extraction procedures.
By R. W. Mayes, R. M. Mason & D. C. Griffin 541

PAGE

Nucleic Acids

Synthesis of deoxyribonucleic acid in BHK-21/C13 cells.
By G. J. Hayton, C. K. Pearson, J. R. Scaife & H. M. Keir 499

The nature of polydisperse ribonucleic acid in plants.
By M. Jackson & J. Ingle 523

Nucleotide sequence analysis with polynucleotide kinase and nucleotide 'mapping' methods. 5′-Terminal sequence of deoxyribonucleic acid from bacteriophages λ and 424.
By K. Murray 569

Appendix: Improved preparation of bacteriophage T4-infected *Escherichia coli* for the isolation of polynucleotide kinase.
By S. G. Hughes & P. R. Brown 583

Polynucleotides associated with histone preparations.
By P. J. Greenaway & K. Murray 585

PAGE

A sequence of seventy-three nucleotides from the coliphage R17 genome.
By U. F. E. Rensing 593

Nucleotide sequences of similar size from the coliphage R17 genome.
By U. F. E. Rensing, A. Coulson & E. O. P. Thompson 605

Lipids

A membrane-bound activity catalysing phosphatidylinositol breakdown to 1,2-diacylglycerol, D-*myo*inositol 1:2-cyclic phosphate and D-*myo*inositol 1-phosphate. Properties and subcellular distribution in rat cerebral cortex.
By E. G. Lapetina & R. H. Michell 433

Carbohydrates

A new neuraminic acid derivative and three types of glycopeptides isolated from the Cuvierian tubules of the sea cucumber *Holothuria forskali*.
By M. Isemura, R. K. Zahn & K. Schmid 509

Selective extraction of polymers from cell walls of Gram-positive bacteria (*Short Communication*).
By J. G. Pavlik & H. J. Rogers 619

PAGE

Small Molecules

Stereoconfiguration of amino acids in peptides from a mycobacillin-synthesizing cell-free system (*Short Communication*).
By S. Sengupta & S. K. Bose 623

Enzymology

Regulation of phosphoenolpyruvate carboxylase of *Zea mays* by metabolites.
By K. F. Wong & D. D. Davies 451

Kinetics of the diamine oxidase reaction.
By W. G. Bardsley, M. J. C. Crabbe & J. S. Shindler 459

The characteristics of the 'peroxidatic' reaction of catalase in ethanol oxidation.
By N. Oshino, R. Oshino & B. Chance 555

Appendix: Analysis of the catalase–hydrogen peroxide intermediate in coupled oxidations.
By B. Chance & N. Oshino 564

The effect of L-ascorbate on catecholamine biosynthesis (*Short Communication*).
By K. J. Stone & B. H. Townsley 611

Phospholipase A_1 of human blood platelets (*Short Communication*).
By J. B. Smith, M. J. Silver & G. R. Webster 615

Contents of Volume 131, No. 4

PAGE

Proteins

The reaction of protein amino groups with methyl 5-iodopyridine-2-carboximidate. A possible general method of preparing isomorphous heavy-atom derivatives of proteins.
By M. Riley & R. N. Perham 625

The use of 3-bromopropionic acid for the determination of protein thiol groups.
By A. F. Bradbury & D. G. Smyth 637

Evidence for the amino acid sequence of porcine pancreatic elastase.
By D. M. Shotton & B. S. Hartley 643

Investigations of the structural function of the J chain in human immunoglobulin M.
By M. J. Ricardo, Jr. & F. P. Inman 677

Interaction of quinacrine mustard with calf thymus histone fractions.
By R.-K. Selander & A. de la Chapelle 757

PAGE

The chemistry of the collagen cross-links. Age-related changes in the reducible components of intact bovine collagen fibres.
By S. P. Robins, M. Shimokomaki & A. J. Bailey 771

A sensitive and accurate gel osmometer.
By A. G. Ogston & B. N. Preston 843

The subunit structure of horse spleen apoferritin: the molecular weight of the oligomer and its stability to dissociation by dilution (*Short Communication*).
By R. R. Crichton, R. Eason, A. Barclay & C. F. A. Bryce 855

The characterization of a non-histone protein isolated from histone F1 preparations (*Short Communication*).
By J. A. Smith & L. A. Stocken 859

PAGE

Effect of steady illumination on the binding of carbon monoxide by carboxymethylated cytochrome *c* (*Short Communication*).
By M. T. Wilson, M. Brunori, J. Bonaventura & C. Bonaventura 863

Nucleic Acids

The oestrogen-stimulated synthesis of heterogeneous nuclear ribonucleic acid in the uterus of immature rats.
By J. T. Knowler & R. M. S. Smellie 689

Interaction of quinacrine mustard with mononucleotides and polynucleotides.
By R.-K. Selander 749

Enzymology

Modulation of guanine deaminase.
By K. Sree Kumar, A. Sitaramayya & P. S. Krishnan 683

Wheat-germ aspartate transcarbamoylase. The effect of ligands on the inactivation of the enzyme by trypsin and denaturing agents.
By R. J. Yon 699

Streptomyces DD-carboxypeptidases as transpeptidases. The specificity for amino compounds acting as carboxyl acceptors.
By H. R. Perkins, M. Nieto, J.-M. Frère, M. Leyh-Bouille & J.-M. Ghuysen 707

Equilibrium binding of nicotinamide nucleotides to lactate dehydrogenases.
By R. A. Stinton & J. J. Holbrook 719

Ionic properties of an essential histidine residue in pig heart lactate dehydrogenase.
By J. J. Holbrook & V. A. Ingram 729

PAGE

The use of ternary complexes to study ionizations and isomerizations during catalysis by lactate dehydrogenase.
By J. J. Holbrook & R. A. Stinson 739

Distribution of enzymes that catalyse reactions of glutathione with $\alpha\beta$-unsaturated compounds.
By L. F. Chasseaud 765

A method for the simultaneous isolation of Factor X and prothrombin from bovine plasma.
By M. P. Esnouf, P. H. Lloyd & J. Jesty 781

The preparation of activated Factor X and its action on prothrombin.
By J. Jesty & M. P. Esnouf 791

Studies on the coagulant enzyme from *Agkistrodon rhodostoma* venom. Isolation and some properties of the enzyme.
By M. W. C. Hatton 799

Human cathepsin B1. Purification and some properties of the enzyme.
By A. J. Barrett 809

Human cathepsin B1. Inhibition by α_2-macroglobulin and other serum proteins.
By P. M. Starkey & A. J. Barrett. 823

Purification and characterization of two fructose diphosphate aldolases from *Escherichia coli* (Crookes' strain).
By D. Stribling & R. N. Perham 833

Intermolecular Organization

The binding of polyribosomes to smooth and rough endoplasmic-reticulum membranes (*Short Communication*).
By F. Rolleston & D. Mak 851

Index 867
